Thought Life in Danger.

It was asserted the Thaw labored under the delusion that his life was always in danger when he was in New York City, and he believed threats had been made to kill him. This accounted for the fact that since January, 1901, he had carried a pistol. He had placed it in his overceat pocket the night he went to the Mudlson Square Roof Garden. There he turned suddenly and saw what he thought was a demon glowering at him. The impulse came. He felt that to kill White would be an act of Providence, and so believing he set deliberately about his task. It was the work of an insane man, Mr. Glosson declared, from the delusions Thought Life in Danger. Mr. Gleason declared, from the delusions of a disordered brain

some instances, but his remarks did not seem to lose weight by the process. In adopting a calm, dispassionate note in addressing the jury, Thaw's attorney followed in the pathway hown by Assistant District Attorney Garvan, who opened for the prosecution at the beginning of to-day's session.

The rumor that there were to be further changes in the jury box would not down until Mr. Garvin actually began his address. It was said that District Attorney Jerome had brought all the pressure and persuasion at his command to gain consent for the r. moval of one or two of the men, but Thaw's counsel held out against all pleading for a further revision of the trial panel.

Mr. Garvan in telling the story of the alleged murder, occupied less than ten minutes, and the prosecution's entre case was kept within two hours. "He ruined my wife," and Mrs. Thaw's remark to her husband, "Yes, but look what a fix you are in now." To this last remark Thaw replied "Dearle, I have probably saved your life."

It was brought out that Thaw looked back at his victim as he walked away "with a staring look in his eyes."

Mr. Garvan's outline of the State's testimony was the briefest possible story of the crime. He told howe went to the roof garden on Madison Square Garden to see the initial production of a summer musical comedy, and then related in simple language the incident of the killing.

"The people claim," he concluded, "that it was a cruel, deliberate, malirious, premeditated taking of a human life. After proving that fact to you, we will ask you to find the defendant guility of the crime of murder in the "grist degree."

Just as an adjournment was taken this afternoon, an hour and a half earlier than usual, Mr. Jerome made an effort to have the defense disclose the names of those who are to be called as its first witnesses. Mr. Garvan concluded by giving the details of Thaw's arrest and indictment by the prosecution.

Meyer Cohen, a song writer, who was in eye-witness of the tragedy, testified hat he saw Thaw on the Madison Square Roof Garden the first time dur-ing the initial act of the musical com-dy. Cohen described on a diagram the position of the table at which White sat.

Delmas's Questions.

Delphin M. Delmas, of counsel for the defense, made his first entrance into the activities of the trial by cross-examining Cohen briefly as to the position he occupied with reference to the principals in the tragedy. These were the only questions put to the witness by Thaw's attorney.

The pistol with which Stanford Whitz was killed was brought into the case in the testimony of Paul Brudi, the fireman who disarmed Thaw after the fatal shots were fixed. Brudi, who appeared on the stand in uniform, identified the pistol when it was shown to him, and said that after taking it from the prisoner he timed it over to the police.

NORFOLK, VA., February 4.—Howard Gould's big and elegantly-fitted-out steam yacht Niagara, with its owner and a party of New York friends aboard, was near destruction of Old Point Comfort early last night, as the result of an effort by the yacht to cross the bow of the three-masted schooner Harbeson Hickman, which was sailing into Hampton Roads before a spanking twenty-flye-mile breeze.

The machinery of the yacht seems to have become disarranged, or else

building until late in the ovening. When Bedford arrived at the Lorraine the servants' dining-room was glosed, and as he was feeling sick, he went Mo bed without anything to eat. He was awakened the next morning by the same detectives and taken to Mr. Garvan's office again. Late in the afternoon the hungry valet, who had had nothing to eat in two days and who was ill and weak, was put through a grueling cross-examination. He staggered home to the Lorraine.

Nelle Leahy declares Bedford's condition was caused by his experience at the hands of Jerome's aids, and was directly responsible for his death a few days later.
